Carrer Objective

Aspiring Backend Developer skilled in Java, Spring Boot, and Node.js. Focused on building secure, scalable RESTful APIs and optimizing database integration in collaborative engineering teams

TECHNICAL SKILLS

- Programming Languages: Core Java, JavaScript
- Frameworks & Library: Spring Boot, Node.js, React.js, Primefaces
- API & Server-Side Technologies: REST API Development, JWT Authentication, JDBC
- Web Technologies & Databases: HTML, CSS, MySQL, postgresql & MongoDB, Docker.
- Tools & IDEs: Postman, GitHub, VS Code, IntelliJ IDEA, Visual Studio 2022, Keycloak

Experience

Role: Developer Intern | iNoble Infoway Solutions, Coimbatore

Feb-May 2026

Data & API Engineering: Designed and implemented scalable REST APIs using Spring Boot and Node.js/Express. Managed complex relational data through JPA/Hibernate and Sequelize ORM, including One-to-Many/Many-to-Many associations, data seeding, and efficient CRUD operations optimized with Pagination and Sorting.

Security & Identity: Integrated Keycloak, OAuth2, and JWT to implement robust Role-Based Access Control (RBAC) and secure cross-origin resource sharing.

Frontend Development: Developed a high-performance e-commerce UI in React.js, utilizing Vite, Hooks, and Props for a responsive, component-driven user experience.

Software Excellence: Practiced the Service-Repository pattern and managed environment-specific configurations via Dotenv to ensure clean, maintainable, and production-ready code.

Education

Erode Sengunthar Engineering College, B.Tech in Information Technology
CGPA - 8.43 /10.0

2022 – 2026

PROJECTS

Authentication & Authorization System (2025)

[Github](#)

Tech Stack: JavaScript, Node.js, Express.js, MongoDB Atlas, Postman.

Built a secure Node.js authentication system with Express, MongoDB, and JWT. Implemented password hashing and OTP verification, mastering RESTful APIs, middleware architecture, and robust backend security workflows.

Hospital Management System (2025)

[Github](#)

Tech Stack: Java, Spring Boot, Spring, Security JDBC, MySQL, Docker, Postman

Built a React/Spring Boot Hospital Management System with secure admin dashboards, RESTful APIs, and MySQL. Containerized with Docker to ensure consistent deployment and efficient patient/appointment management.

Employee Management System Task(2026)

Tech Stack: Java, Spring Boot, React.js, Bootstrap, MySQL, Postman

[Github](#)

Built a full-stack Employee Management System using Spring Boot and React. Implemented RESTful APIs for CRUD operations, managed data with MySQL/JPA, and designed a responsive UI with Bootstrap.

ACHIEVEMENTS & CERTIFICATIONS:

LANGUAGES KNOWN :

- 2nd Prize - Web Development (2024, Kongu Engineering College)
- 1st Prize - Code Debugging (2025, National Engineering College)
- Courses: Spring Boot & Core Programming in java

English

Kannada

Tamil

Telugu
